resulting in high prices, possibly as high as in 1866. Moreover, the disparity in production and consumption will continue to increase indefinitely as there is no country in all this wide earth that can talo the place as an exporter of wheat which we are about to advocate for once and all. Not this year however nor next.

I am not able to prove but I believe that just as soon as wheat advances sharply in price we shall convert cornfields into wheatfields and then corn also will vance sharply, always, provided, we do not have one or two crops in succession which are above the average in yield.

Permit me to further state that the investiguitions being pressed show that, in-cluding the available lands in the Indian Territory, all the lands of the arid plains and mountain districts, that is suscepti-ble of indian.

ble of irrigation, all the lands of the United States, state, college, school, railways and individual and so much of existing farms as can be brought under cultivation, yet there remains unoccupied or unimployed of arable lands an equivalent of but 560,000 farms of 160 eres each and which is sufficient, when brought under cultivation, to meet the requirements (at small rate of production per acre and same rate of consumption per capita, as now, of the popula-tion which will be added during the next five years only, but it will, I think, be im-possible to bring these widely scattered lands all into cultivation within five tion per capita, as now, of the populayears, or even one-fourth of them, as Indian titles must, in many cases, be extinguished, and in others the owners will prefer to wait for higher prices, but not being able to get all these lands to belp meet growing demands we shall be enabled to dispose of the existing surplus of 10,000,000 acres of cultivated lands, and when this occurs will come the high prices which the farmer needs no more than the townsman who is idle or unprofitably employed, solely because the 26,000,000 people who live upon farms have so little to buy with.

If the farmer was properly renumer-ated for his labor he would buy immense quantities of the products of those who work in shop and factory. An agricultural population of 26,000,000 can not be in impoverished condition without affect ing in the most serious manner the wel-fare of nearly every class. At all events I have been so informed and believe, as I also believe the denizen of the town add be better off by far if he was paying 50 per cent more for farm products, as his own labor would then be in constant

Whether the farmer desires it or not there remains of the arable lands of the ries by a particle of statistical or other occupied and this is, to all intents and gibie to the presidency. data, seeming to rely upon adjectives purposes, an exhaustion of the arable rather than facts.

I intend neither to question or controlic the opinions of these gentlemen but wer the opinions of these gentlemen but will continue with or without free trade. desire permission to state such facts as will continue with or without mono-metalism, with or without mono-metalism, with or without combines, as the farmer will will continue with or without free trade am still pursuing and I am glad to leave then be able to sell when prices suit, can theories of free trade, protection, green-backs, mono-metallism, option dealing, able article and because we must soon transportation, silver coinage, deficient enter the markets of the world and com-
